18.	Common Merganser 5		40. Bushtit 38		63. Purple Finch 4
19.	Ruddy Duck 6		41. Brown Creeper 1		64. House Finch 1
20.	Bald Eagle 1	*3	42. Bewick's Wren 2		65. Pine Siskin 1
21.	Northern Harrier 1	*4	43. Winter Wren 1		66. American Goldfinch 5
22.	Sharp-shinned Hawk 1	*5	44. Marsh Wren 23		
			45. Golden-crowned Kinglet	5	

NOTES

- *1 Both were seen and one provided the census teams with great views, as it skulked near the NE. fish gate.
- *2 Larger flocks flying over W. meadows to the SE. with this flock flying low enough to include on the census.
- *3 One sub-adult flying low from W. over the lagoon, flushing most of the ducks and continued out of the area.
- *4 One adult female on low logs near interior mid meadow service gate. See note below for more observations.
- *5 One juvenile male perched in a willow tree near the N. lagoon control gate.
- *6 One adult perched on a S. island snag. One juvenile briefly on a snag NW. of lagoon, displaced by two crows.
- *7 Both NW. resident adults seen in NW. quadrant, various perches. One SW. adult on SW. power line tower.
- *8 One juvenile on various W. meadow and lagoon island snags. One adult in NE. quadrant field, W. of N. ditch.
- *9 Myrtles race individuals numbered 55 and there were 11 of the Audubon's race.

MORE NOTES

Two wigeon hybrids were noted, but not listed and maybe someday will be known as Amereurasion Wigeon. No owls observed in owl box SW. of the site and evidence of owls noted, but not seen at Anderson Park pines. The adult female harrier flew to the NE. forest to intercept and escort a second harrier S. out of the area, then later she was seen flying hard to the N. and intercepted the same, or possibly a third harrier, escorting it out.
